

Special Offer 5+1 in May and June 2024

Original WEINIG cardan shafts guarantee the availability of your machine

Cardan shafts are often exposed to high loads in the production process. A defective cardan shaft can bring your machine to a standstill. Hopefully you always have a replacement at hand. If not, we will be happy to help you get your machine up and running again as quickly as possible.

If you order 5 cardan shafts, you will receive 1 free of charge

Your benefits at a glance:

- Increase your machine availability and prevent unplanned machine downtime
- In the event of downtime, delivery by express delivery is much more expensive than timely dispatch by standard parcel service
- Increase the efficiency of your machine by replacing wearing parts in time
